

Water-based and solvent-based products for automotive polyurethane applications.

Chem-Trend gives you one global company with deep expertise addressing all of your polyurethane manufacturing release agent and ancillary product needs.

With more than 50 years of experience proudly serving the automotive industry, we provide innovative culture and vast R&D resources that give our customers the very best people, expertise, and products available on the market today.

CHEM-TREND PROUDLY OFFERS:

- A complete water-based and solvent-based product portfolio
- Industry-leading performance
- Wide temperature application range
- Product stability

CHEM-TREND PROVIDES SOLUTIONS FOR MOST CHALLENGING POLYURETHANE APPLICATIONS:

- High Resiliency (HR) Foam
- Reaction Injection Molding (RIM)
- Acoustical Foam
- Integral Skin
- Rigid Foam

To learn more about how we have developed advanced products to address the specific challenges found in polyurethane manufacturing, contact us today.

Release Innovation™

Water-based and solvent-based products for non-automotive polyurethane applications.

At Chem-Trend, our mold release agents for polyurethane provide a competitive advantage to the largest and smallest manufacturers alike.

We offer water and solvent-based release agent solutions that can maximize productivity while meeting the most demanding specifications and operating conditions.

BEYOND AUTOMOTIVE APPLICATIONS, WE SERVE NEEDS IN THE FOLLOWING INDUSTRIES:

- Footwear (shoe sole)
- Construction and decorative
- Furniture and bedding
- Recreational (roller blade wheels, sporting equipment, etc.)

CHEM-TREND PROVIDES SOLUTIONS FOR MOST CHALLENGING POLYURETHANE APPLICATIONS:

- High Resiliency (HR) Foam
- Viscoelastic
- Cast Elastomer
- Iso-Binder
- Concrete
