BUILDING A REPUTATION

For fifty years, Chem-Trend's reputation has been built on a foundation of providing value and service. Chem-Trend has a singular focus of developing and manufacturing innovative release products for use in a variety of industries. We become directly involved in our customers' processes and apply our development expertise to provide our customers with tailored solutions to their unique problems that improve their overall productivity and quality. At the core of our business are industry-standard mold release agents, die lubricants, tire paints and purging compounds engineered to maximize our customers' productivity and help them deliver high-quality finished products.

Working with Chem-Trend's concrete release agent team goes far beyond just obtaining product. We are committed to bringing you premier Chem-Trend® release agents and ancillary products such as mold cleaners, mold sealers and other mold maintenance products to the concrete industry. Our manufacturing facilities, sales and service offices cover the world, with a global distribution network offering our products and services to meet the needs of the concrete industry.

Chem-Trend's technical center, located in Howell, Michigan, with additional product development and support laboratories in Europe and technical service laboratories in South America and Asia are an excellent example of our commitment to providing our customers with greater value. Chem-Trend's test facilities house equipment allowing us to simulate our customers' processes during development and quality testing before products reach the customer. These investments were made so our customers know when they choose Chem-Trend® they have a high quality, world tested product ready to solve their unique processing challenges.

Chem-Trend ensures customer satisfaction by focusing on productivity and performance of our products in support of our customers' manufacturing processes. It's an approach that has provided our customers with the best service and support available in the industry today.

Putting it all together—that's quality.

That's the value of Chem-Trend.

CHEM-TREND RELEASE AGENTS for Concrete and Stone Veneer

Mold life and part de-molding are points of critical performance for concrete and stone veneer manufacturing. These processes are where

Chem-Trend's concrete mold release products can improve your productivity and part quality. Our Chem-Trend® brand of mold release agents provide a competitive advantage to the largest and smallest manufacturers alike with water- and solvent-based release agent solutions that can maximize productivity while meeting the most demanding of specifications and operating conditions. Chem-Trend release agents for concrete and stone veneers manufacturers provide:

- Extended service life of flexible molds
- Optimal pigment transfer and color appearance
- Improved release ease
- Highly dilutable water based materials
- Cleaner, safer environments
- Higher quality parts
- Less downtime
- Lower scrap rates
- Cleaner molds

When customers purchase Chem-Trend® release agents, they also gain access to a worldwide support network of industry professionals committed to providing the right product for their application. We make our global expertise available locally to our customers through our sales, technical and support professionals. Our production facilities use leading development, testing and production equipment and processes to assure consistent batch-to-batch products. Do you have a unique application that requires something more? Chem-Trend can custom formulate solutions to meet your unique needs.

SUPPORT PRODUCTS

Innovation doesn't end with our release agent technology. A comprehensive product line of support products works in unison with our release agents to help maximize productivity, quality and profitability. Chem-Trend's system approach to product development has allowed us to co-develop a series of complimentary products that maximize overall release performance. With our industry leading release agents, a dedicated team of professionals is available to work with customers to determine just the right sealer or master mold release agent product for your application. Chem-Trend's support products can make the difference between making it and making it profitably.

SUPPORT CONCRETE AND STONE VENEER PRODUCTS

Chem-Trend offers a complete line of mold sealers and flexible mold making release agents to meet the needs of virtually any applicable concrete or stone veneer manufacturing process.

PRODUCT CATEGORY PRODUCT BENEFITS

Mold Sealers

Chem-Trend® sealers provide a durable barrier to prevent mechanical and chemical bonding to the mold surface. These products are used to prepare flexible molds to help extend their useful life and enhance release for difficult to release parts. Chem-Trend mold sealers have been formulated to work most effectively in a system approach in combination with Chem-Trend release agents in pre-production or production touch-up applications.

Mold Making Release Agents

For non-metallic mold manufacturing, Chem-Trend offers a line of mold release agents that assist in easier manufacturing of your master molds. Our mold making release agents provide easy release of the mold from the stone or concrete master, improved grain definition for more realistic looking parts and less mold material build-up on the master stones.

For more information on specific Chem-Trend ancillary products, visit www.chemtrend.com or contact your nearest Chem-Trend sales office or distributor.

A world of support

Chem-Trend brings global expertise to each customer:

- Leading-edge mold release agent and support products development laboratories
- Manufacturing facilities on four continents
- Sales and service offices in 17 countries
- Distribution network across more than 50 countries
- Around-the-clock product support available
