PRODUCT NAME	PRODUCT DESCRIPTION	COMMON USES	CONTAINERS	COMPATIBLE ELASTOMERS
Chem-Trend® SprayFoam Silicone	Blend of silicones and specialized parting agents specifically designed to prevent spray polyurethane foam insulation from adhering to most surfaces.	Preventative spray coating for a variety of hard surfaces to protect and prevent overspray from sticking.	10.5 OZ aerosol 4.5 OZ aerosol	
Chem-Trend® SprayFoam Release Wipes <i>(Nonflammable and surface safe.)</i>	Water-based release wipes. Blend of silicones and specialized parting agents specifically designed to prevent spray polyurethane foam insulation from adhering to most surfaces.	Preventative spray coating for a variety of hard surfaces to protect and prevent overspray from sticking. <i>Safe for airplane travel.</i>	100 Wipes per can 6 Cannisters per case Refill Packs (Wipes only)	
Chem-Trend® CR-19602W	Concentrated water based barrier product designed to prevent chemical stains on concrete and other hard surfaces.	Concentrated - dilute with up to 9 parts water. Apply with pump-up sprayer.	1 Gallon 5 Gallon 55 Gallon	
Chem-Trend® FC-10008	A multipurpose product, it can be used to purge liquid isocyanates in the first step of the flush process and is an excellent choice for storage oil.	ISO purge for supply lines and equipment. Single solution, light to medium duty flush cleaner. Step 1 of deep clean flush. Step 2 with SprayFoam Flush 4. <i>Storage Oil and Mesamol replacement.</i>	1 Gallon 5 Gallon 55 Gallon	Neoprene, Silicone, Ethylene Propylene Polymers, Styrene, Butadiene, Natural Rubber, Polypropylene, Epoxy, Teflon, Nylon 6,6 Resistance of any material will vary depending on elastomer source and contact time. <i>Test before use.</i>
Chem-Trend® MOC-10014	Excellent low hazard cleaner that attacks resinous buildup to remove it from spray foam tanks and equipment. Formerly known as Flush 1.	Preventative, daily flush applications. Light to medium duty soaking agent Step 2 of medium duty flush, combine with Step 1, FC-10008.	1 Gallon 5 Gallon 55 Gallon	Neoprene, Silicone, Ethylene Propylene Polymers, Styrene, Butadiene, Natural Rubber, Polypropylene, Epoxy, Teflon, Nylon 6,6 Resistance of any material will vary depending on elastomer source and contact time. <i>Test before use.</i>
Chem-Trend® SprayFoam Flush 4	Powerful flushing solvent and cleaner for spray polyurethane foam mixing and metering equipment. Designed to remove polyurethane components from metal and plastic surfaces.	Removes cured resin from ISO tank, hoses, metering equipment, and guns. Hardened ISO is the primary reason for cleaning. Combine with FC-10008 for optimal results. <i>Often requires extended circulation.</i>	1 Gallon 5 Gallon 55 Gallon	Buna, Fluoroelastomer (FKM), Hastelloy C, Nylon, PTFE, PVDF Resistance of any material will vary depending on elastomer source and contact time. <i>Test before use.</i>
Chem-Trend® SprayFoam Remover	Powerful stripping agent that attacks SprayFoam foam. The most effective, easy-to-handle foam urethane resin remover available, this product is completely soluble with water and most organic solvents.	Excellent tool and equipment cleaner for soak-tank use and full immersion. Recommended for bare metal only. Do not use on plastics, painted surfaces, or clear coats without confirmed compatibility. <i>Not for flush cleaning.</i>	1 Gallon 5 Gallon 55 Gallon	Perfluoro elastomer, Viton® ETP, Aflas® TFE/P, Viton® FKM, Buna-N NBR, Silicone, Fluoro Silicone Resistance of any material will vary depending on elastomer source and contact time. <i>Test before use.</i>
